|---|-------------------------------------|-----|--|
| 1. All waste stored in lined rolloff boxes? | <input checked="" type="checkbox"/> | Yes | <input type="checkbox"/> No <input type="checkbox"/> N/A |
| 2. Rolloff boxes covered after filled (or end of day)? | <input checked="" type="checkbox"/> | Yes | <input type="checkbox"/> No <input type="checkbox"/> N/A |
| 3. Any evidence of oily waste or oily waste waters? | <input checked="" type="checkbox"/> | Yes | <input type="checkbox"/> No <input type="checkbox"/> N/A |
| 4. If yes, was it adequately addressed? | <input checked="" type="checkbox"/> | Yes | <input type="checkbox"/> No <input type="checkbox"/> N/A |
| 5. How many samples were collected? | | | |
| | | | |
| Additional Comments : During the assessment WASR observed a liquid spill during the unloading of hard boom to the decon ara. Hard boom is stored (contaminated boom) in containers that are lined and moved to decon area. Decon teams cut the liner to remove boom and when it was removed is when the spill of liquid occurred. Heritage Environmental will clean up the spill and reassess the process. WASR also noticed flammable liquid cans stored in secondary containment of oil storage tanks. Debris was also stored in this area and Heritage Environmental will remedy this situation. | | | |
